

TITLE

WATER DISPERSIBLE POLYPYRROLES MADE WITH POLYMERIC
ACID COLLOIDS FOR ELECTRONICS APPLICATIONS

ABSTRACT

5 Compositions are provided comprising aqueous dispersions of at
least one polypyrrole and at least one colloid-forming polymeric acids at
methods of making such compositions. The new compositions are useful
in electronic devices including organic electronic devices such as organic
light emitting diode displays, memory storage, electromagnetic shielding,
10 electrochromic displays, and thin film transistors, field effect resistance
devices.
